

3 Technical Safety Concept „System“ (Item)

3.1 Safety Requirements at System Level (derived from FSC)

Note: Required cycle times are assumed values and shall be adjusted in the final solution to achieve the requirements to FTTI

Ref.	ID	Requirement	ASIL
FSR1 FSR4	SYSR1	The status of motor shall be monitored in a cycle time lower than 0,25s	B
FSR1 FSR4	SYSR2	The motor current shall be compared with the wanted value in a cycle lower than 0,25s	B
FSR1	SYSR3		
FSR2	SYSR4		
FSR3	SYSR5		
FSR5	SYSR6		
FSR6	SYSR7		
FSR6	SYSR8		

3.2 Safety Requirements to the HW-Architectural Metrics

Ref.	ID	Requirement	ASIL
SG1	SYSR10		
SG1	SYSR11		

3.3 Safety Requirements to the Probabilistic Metric for random Hardware Faults (PMHF value)

Ref.	ID	Requirement	ASIL
SG1	SYSR20
